Juan Pablo Sánchez Rey

Full Stack Developer | Java · Spring Boot · Angular · TypeScript

Bucaramanga, Santander, Colombia · juanpablosanchez744@gmail.com · linkedin.com/in/juan-pablo-sanchez-rey · github.com/JuanPabloSR · Interactive version: juanpablosr.github.io/pip-boy-website/

PROFESSIONAL SUMMARY

Full Stack Developer with 4+ years of experience building scalable enterprise software. Specialized in backend with Java and Spring Boot (clean architecture, microservices, messaging) and frontend with Angular and TypeScript (micro-frontends, PrimeNG).

Proven experience in quality assurance (JUnit, Mockito, Jasmine, Karma, SonarQube) and cloud deployments (AWS, Azure). Complementary knowledge of React.js, Vue.js and AI application development with Python (LLMs).

Used to agile environments (Scrum). I stand out for communicating technical concepts clearly to business stakeholders, adapting quickly and proactively improving performance and core architecture.

TECHNICAL SKILLS

- **Backend:** Java, Spring Boot, Spring Security, Spring Data JPA, Hibernate, WebFlux (Reactive), Microservices, Apache Camel
- **Frontend:** Angular, TypeScript, JavaScript, PrimeNG, PrimeFlex, React.js, Vue.js, Bootstrap, SASS, HTML5, CSS3
- **Testing & quality:** JUnit 5, Mockito, Jasmine, Karma, SonarQube, TDD
- **Databases:** PostgreSQL, MySQL, MongoDB, SQL (native queries, stored procedures)
- **Messaging:** ActiveMQ, RabbitMQ, Apache Kafka, AWS SQS (DLQ)
- **Cloud & DevOps:** AWS (EC2, S3, API Gateway, RDS, CloudFront, Elastic Beanstalk, SQS, Parameter Store), Azure Pipelines, Docker, Kubernetes, Grafana, Prometheus, Git, GitFlow
- **Artificial intelligence:** LLMs, Python, AI API integration
- **Methodologies:** Scrum, Clean architecture, DDD, SOLID, Hexagonal architecture
- **IDEs:** IntelliJ IDEA, VS Code, Kiro IDE, Antigravity IDE

WORK EXPERIENCE

Full Stack Development Analyst · Java / Angular — Nexos Software

09/2023 – Present · Medellín, Colombia (remote)

Full stack development of distributed solutions using clean architecture and microservices for enterprise clients.

Current assignment · Financial institution

- Build core projects for a financial institution in the banking sector.

Carvajal Tecnología y Servicios project

- Develop Java microservices with Spring Boot applying clean architecture, SOLID principles and ActiveMQ message queues.
- Build scalable UIs with Angular, ReactJS, TypeScript and PrimeNG using a micro-frontend approach.
- Explain frontend architecture decisions to the product team in non-technical language.
- Write unit tests with JUnit and Mockito (backend) and Jasmine / Karma (frontend); analyze coverage with SonarQube.
- Take part in Scrum ceremonies (planning, dailies, reviews and retrospectives) and propose process improvements.
- Deploy and support cloud apps on Azure (Azure Pipelines) and AWS (API Gateway, S3, CloudFront).

Achievements

- Raised test coverage with unit and integration tests, improving stability and reducing production regressions.

- Designed Angular micro-frontend components that improved scalability and user experience, proactively proposing the solution to a bottleneck.
- Cut delivery times by helping automate CI/CD pipelines on Azure and AWS, and documented the process for the team.

Full Stack Developer Consultant — Sofka Technologies

02/2022 – 04/2023

Full stack consulting for core systems of financial and insurance clients.

- Build low-latency reactive systems with Spring WebFlux and Project Reactor.
- Apply Clean Architecture and Domain-Driven Design to mission-critical systems.
- Design domain event flows with RabbitMQ and Apache Kafka.
- Model schemas in relational (PostgreSQL / MySQL) and NoSQL (MongoDB) databases.

EDUCATION & CERTIFICATIONS

- **Software Analysis and Development Technologist (ADSO)** — SENA (09/2023 – 06/2026). Valid professional license · COPNIA
- **Artificial Intelligence Bootcamp** — Talento Tech · MinTIC
- **Software Development Training** — Sofka University (11/2021 – 02/2022)
- **EF SET English Certificate** — EF Education First (2023)
- **Spring Framework University** — Udemy (2022)
- **Web Development University** — Udemy (2022)

PROJECTS

- **Pip-Boy 3000 · this site** (Personal project): Interactive portfolio inspired by the Fallout series: keyboard navigation, CRT effects, Web Audio synthesized sound, radio, maps built from real geographic data and a RobCo terminal with a hacking minigame.
- **Distributed platform · Carvajal** (Work · Nexos Software): Distributed solutions under clean architecture: Spring Boot microservices with ActiveMQ messaging and Angular / React micro-frontends, deployed on Azure and AWS.
- **Vera Villamizar Abogados** (Freelance): Technical and commercial proposal, plus the landing page for the law firm.
- **Feco project** (Enterprise integration): Integration and routing flows between systems with Apache Camel.
- **AI lab** (Training · Personal): Python and language model apps: AI API integration and experiments with local models.
